“When I saw him plunge into the inferno that was the Hindenburg, to rescue passengers, I knew I had witnessed an event that would change the world as we knew it! I was just a junior reporter back then, but the only one from the Star there so I got the byline... It was me who gave him the name Avatar. I wrote he was an *‘avatar of the future of man’*, and it stuck!” Jeannette “Jeannie” Johnson, retired editor of the Halcyon Star in an interview for Super-Insider, 1997

In 1986, seven years after his disappearance during the Xyhidrion affair and the purported invasion by hostile aliens, the long believed dead Avatar reappeared in California, just as other super humans were being reported all across the United States of America. This marked the end of what scholars of the super human culture later called the super black-ops period.

Avatar soon organized other west coast supers into a new version of the Protectors. The original Protectors under Jamaal Warren had never truly disbanded and after his death various lesser known vigilantes had claimed membership, so Avatar’s new Protectors became known as the Western Protectors.

While Avatar seemed as formidable as ever he soon displayed powers hitherto unknown. When the media questioned him about them, his return, or any other details about his disappearance, Avatar offered no direct answer. He also stopped using the name Robert Hurrington and simply became Avatar.

The Congressional Committee looking into the Iran-Contra-Blackthorn affair probed the Blackthorn’s corporation ties to the Xyhidrion affair and summoned Avatar, but he refused to testify. Unlike the Nixon Administration scandal and ensuing conflict this time the US Congress took no action to force him to testify and simply dropped the matter.

Through the remaining 80’s and early 90’s Avatar was an outspoken defender of superhuman rights and a leader in the community, spearheading the reunification of the Western Protectors and the New York team, and the formation of the Protector Plan to recruit and train superhumans across the US, Canada and Mexico.

This will all change after the breakout at The Crypt and the worldwide disaster caused by the destruction of the Protector’s orbital base...

Unknown to the general public Avatar was not resurrected in the truest sense of the word. After his physical form was destroyed during the final battle against the Xyhidrion Ultra Command the energy that first gave him his power when Robert Hurrington discovered the Kyridion Cristal in the meteorite remained behind. Hurrington consciousness survived somehow in the energy itself. It took him years to reform and recreate in a semi solid physical form. Avatar powers stem from this light form instead of the physical might that made him famous. This new form required all his concentration to maintain his physical form and when at rest or distracted Avatar often became insubstantial. He also had problems establishing emotional connections with his previous memories and new relationships.
